Try this (I have had to do a mail merge since switch to 2016 so I am guessing here: [note to others: anyone with better suggestion free to add suggestions] • First open Excel 2016 and open up your mail merge list.

• Next Make sure the First Row have Header Titles such as: Name Address City State Zip Phone Email 1 Email 2 Web Page • Now do a Save As.. • Next Go to Mail Merge and add your headers (name, address, etc) to the page Select the excel File you just saved as the File to use for the merge information If you have used Mail merge in the past you should know how to add the items.. I have just installed 2016 on my mac (office 365) as an upgrade from 2011 which was on it and now the mail merge will not work..) • Quit Excel (the converter in Word will not run if Excel is running) • Now open Word to a Blank Document.. I have yet to find any possible workaround, with any new filename, changing to xls or.
